

Sleep Disorders Dentistry RLC

The only “Brick & Mortar” facility in Canada purposely built to teach Dental Sleep Medicine to Dentists and their Teams.

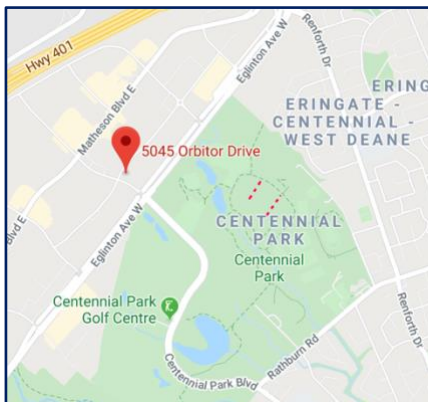

Managing sleep apnea patients in this environment helps ensure that patients have access to the most current advancements, technologies and appliances as they become available.

Our Clinic is 100% devoted to Dental Sleep Medicine and we are dedicated to providing the most current evidence-based therapies.

Our appliance fee is a “Global Fee” that includes the custom appliance, all necessary adjustments, use of objective testing to ensure that the appliance is optimally calibrated and a follow-up appointment at 6-months to ensure that the appliance remains optimally calibrated.

Patients are always referred back to the prescribing physician to conduct a follow-up efficacy study and are placed on an annual follow-up schedule to help ensure continued appliance efficacy.

Reports are sent to the prescribing & family physicians and also the family dentist for all AADSM milestones.

“Snoring & Sleep Apnea Solutions”

About Our Center

Patient Care:

- The most Current Protocols, Technologies and Appliances.

Education:

- Evidence Based Class & Cloud CE Taught to AADSM Standards.

Research:

- Dedicated to Improving Dental Sleep Medicine by Developing New Protocols & Technologies.

We follow all AADSM Protocols and report to physicians at the following milestones: consultation, appliance delivery, once appliance calibration is complete, six months following calibration, and yearly thereafter. If we become aware that the patient stops wearing their appliance, they will be referred back for a medical follow up with a final report.

Appliance patients have unlimited access to objective level III Home Sleep Testing and/or Pulse Oximetry to establish optimal calibration. Objective MATRx Plus testing is also available to establish response to therapy. A copy of final reports will always be forwarded to both the prescribing and family physicians. ***We do not utilize Home Sleep Testing for any other purpose.***
